

PATENT COOPERATION TREATY

PCT

NOTIFICATION OF ELECTION

(PCT Rule 61.2)

From the INTERNATIONAL BUREAU

To:

United States Patent and Trademark
Office
(Box PCT)
Crystal Plaza 2
Washington, DC 20231
ETATS-UNIS D'AMERIQUE

in its capacity as elected Office

Date of mailing (day/month/year) 17 March 1998 (17.03.98)	
International application No. PCT/EP97/04774	Applicant's or agent's file reference HF 96177/PCT/061
International filing date (day/month/year) 02 September 1997 (02.09.97)	Priority date (day/month/year) 04 September 1996 (04.09.96)
Applicant DEL SOLDATO, Piero et al	

1. The designated Office is hereby notified of its election made:

☒ in the demand filed with the International Preliminary Examining Authority on:

26 February 1998 (26.02.98)

☐ in a notice effecting later election filed with the International Bureau on:2. The election ☒ was☐ was not

made before the expiration of 19 months from the priority date or, where Rule 32 applies, within the time limit under Rule 32.2(b).

The International Bureau of WIPO 34, chemin des Colombettes 1211 Geneva 20, Switzerland	Authorized officer Catherine Massetti
Facsimile No.: (41-22) 740.14.35	Telephone No.: (41-22) 338.83.38

INTERNATIONAL APPLICATION PUBLISHED UNDER THE PATENT COOPERATION TREATY (PCT)

(51) International Patent Classification ⁶ : C07D 213/00, 213/74, 231/1285, 239/91, 285/28, 295/14, 307/52, 311/00, 311/22, 333/22, 409/12, 417/12, A61K 31/405, 31/245, 31/63	A2	(11) International Publication Number: WO 98/09948 (43) International Publication Date: 12 March 1998 (12.03.98)
(21) International Application Number: PCT/EP97/04774 (22) International Filing Date: 2 September 1997 (02.09.97) (30) Priority Data: MI96A001821 4 September 1996 (04.09.96) IT (71) Applicant (for all designated States except US): NICOX S.A. [FR/FR]; 45, avenue Kléber, F-75116 Paris (FR). (72) Inventors; and (75) Inventors/Applicants (for US only): DEL SOLDATO, Piero [IT/IT]; Via Toti, 22, I-20052 Monza (IT). SANNICOLLO, Francesco [IT/IT]; Alzaia Naviglio Grande, 46, I-20148 Milano (IT). (74) Agents: SAMA, Daniele et al.; Sama Patents, Via G.B. Morgani 2, I-20129 Milano (IT).		(81) Designated States: AL, AU, BB, BG, BR, CA, CN, CZ, EE, GE, HU, IL, IS, JP, KP, KR, LK, LR, LT, LV, MG, MK, MN, MX, NO, NZ, PL, RO, RU, SG, SI, SK, TR, TT, UA, US, UZ, VN, ARIPO patent (GH, KE, LS, MW, SD, SZ, UG, ZW), Eurasian patent (AM, AZ, BY, KG, KZ, MD, RU, TJ, TM), European patent (AT, BE, CH, DE, DK, ES, FI, FR, GB, GR, IE, IT, LU, MC, NL, PT, SE), OAPI patent (BF, BJ, CF, CG, CI, CM, GA, GN, ML, MR, NE, SN, TD, TG). Published Without international search report and to be republished upon receipt of that report.

(54) Title: NITRIC ESTER DERIVATIVES AND THEIR USE IN URINARY INCONTINENCE AND OTHER DISEASES**(57) Abstract**

Use of the following groups of compounds or their compositions for the preparation of medicaments for the treatment of urinary incontinence, such compounds having general formula: A-X₁-NO₂ or their salts, where A = R(COX)_t, and where t is an integer 0 or 1; X = O, NH, NR_{1C}, where R_{1C} is a linear or branched alkyl having from 1 to 10 C atoms; R is (IA) where t = 1 and X₁ is equal to -YO- where Y is a C₁-C₂₀ alkylene, C₅-C₇ cycloalkyl or oxyalkyl derivatives.

PCT

INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference HF 9617/PCT/061	FOR FURTHER ACTION see Notification of Transmittal of International Search Report (Form PCT/ISA/220) as well as, where applicable, item 5 below.	
International application No. PCT/EP 97/ 04774	International filing date (day/month/year) 02/09/1997	(Earliest) Priority Date (day/month/year) 04/09/1996
Applicant NICOX S.A. et al.		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 9 sheets.

☒ It is also accompanied by a copy of each prior art document cited in this report.

- ☒ Certain claims were found unsearchable (see Box I).
- ☒ Unity of invention is lacking (see Box II).
- ☐ The international application contains disclosure of a nucleotide and/or amino acid sequence listing and the international search was carried out on the basis of the sequence listing
 - ☐ filed with the international application.
 - ☐ furnished by the applicant separately from the international application,
 - ☐ but not accompanied by a statement to the effect that it did not include matter going beyond the disclosure in the international application as filed.
 - ☐ Transcribed by this Authority
- With regard to the title,
 - ☐ the text is approved as submitted by the applicant.
 - ☒ the text has been established by this Authority to read as follows:
Nitric ester derivatives and their use in urinary incontinence and other diseases
- With regard to the abstract,
 - ☒ the text is approved as submitted by the applicant.
 - ☐ the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this International Search Report, submit comments to this Authority.
- The figure of the drawings to be published with the abstract is:
 - Figure No. ☐ as suggested by the applicant.
 - ☐ because the applicant failed to suggest a figure.
 - ☐ because this figure better characterizes the invention.
 - ☒ None of the figures.

INTERNATIONAL SEARCH REPORT

International application No.
PCT/EP 97/04774

Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:

2. ☒ Claims Nos.: 1(partially)-6(partially)
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:

In view of the great number of compounds for which protection is being sought in claim 1, the search has been restricted for economical reasons to compounds of the examples and the first inventive concept.

3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1. ☒ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.

2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.

3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:

4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☒ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/

1. Claims: 1,2

Use of the compounds A-X1-N02, A being R(COX)t and R being choosen from groups I A) to V A) for the preparation of medicaments for treating urinary incontinence

The subject matter of the present application is not unitary contrary to the requirements of R.13. 1 PCT.

With respect to the present claims 1 to 6, the ISA is unable to see any common inventive concept linking these claims as:

The subject matter of claim 1 is directed to the USE of compounds of a general formula A-X1-N02, with A being R(COX)- and R is choosen from groups I a) to V A) for the manufacture of a medicament for treating URINARY INCONTINENCE.

Claims 3 and 4 are directed to a sub-class of said compounds (or compositions containing them) of the general formula above, R is choosen from group V A)

The subject matter of claim 5 is directed to a sub-class of compounds of a general formula A-X1-N02, with A being R(COX)- and R is choosen from groups V A)(or compositions containing said compounds) for use as medicament for treating:

- a) musculoskeletal disease of an inflammatory nature
- b) respiratory diseases
- c) gynaecological or obstetrical diseases
- d) vascular diseases
- e) gastrointestinal tumors

The subject matter of claim 6 is directed to the use of compounds of a general formula A-X1-N02, with A being R(COX)- and R is choosen from groups I a) to VI A) for the manufacture of a medicament for treating diseases b) to e) listed above

With respect to the various definitions of R given in the present application, it appears that they shall necessarily comprise a -O-N02 moiety as SOLE structural requirement. Organic nitrates comprising the same moiety -O-N02 are well known in therapy of cardiovascular diseases (see W09201688 or W09421618). The compounds when R belongs to the groups I A) to IV A) and VI A) are already known for therapy (see W09530641).

=> In other words, the present application covers the use of compounds comprising said -O-N02 moiety for various therapeutic uses.

As some of the compounds are already known in therapy, the ISA comes to the conclusion that the present application is directed to the subsequent therapeutical uses of partially known compounds. The ISA is unable to identify any common inventive concept which links the subsequent claimed

FURTHER INFORMATION CONTINUED FROM PCT/ISA/

diseases: urinary incontinence and the diseases a)-e) listed above. Accordingly, the present application is not unitary.

For instance, claim 6 when it refers to the compounds when R belongs to the groups I A) to IV A) and VI A) comprises the following 4 different inventions:

- 1) use of compounds of formula A-X1-NO2 with A= R(COX)t, R is a moiety according to any of groups I a)- IV A) for the preparation of medicaments for treating respiratory diseases
- 2) use of compounds of formula A-X1-NO2 with A= R(COX)t, R is a moiety according to any of groups I a)- IV A) for the preparation of medicaments for treating gynaecological or obstetrical diseases
- 3) use of compounds of formula A-X1-NO2 with A= R(COX)t, R is a moiety according to any of groups I a)- IV A) for the preparation of medicaments for treating vascular diseases
- 4) use of compounds of formula A-X1-NO2 with A= R(COX)t, R is a moiety according to any of groups I a)- IV A) for the preparation of medicaments for treating gastrointestinal tumors

A comprehensive search for the subsequent inventions would have caused major additional searching efforts

Accordingly, the present application comprises the following 6 inventions:

1st invention:
see above Subject 1

2nd invention
claims 3-5 and 6(partially)
use of compounds of formula A-X1-NO2 with A= R(COX)t, R is a moiety according to any of groups V A) for the preparation of medicaments for treating respiratory diseases, gynaecological or obstetrical diseases, vascular diseases or gastrointestinal tumors

3rd invention:
claim 6(part.)
use of compounds of formula A-X1-NO2 with A= R(COX)t, R is a moiety according to any of groups I a)- IV A) and VI A) for the preparation of medicaments for treating respiratory diseases

4th invention:
claim 6 (part.)
use of compounds of formula A-X1-NO2 with A= R(COX)t, R is a moiety according to any of groups I a)- IV A) and VI A) for the preparation of medicaments for treating gynaecological or obstetrical diseases

5th invention:
claim 6(part.):
use of compounds of formula A-X1-NO2 with A= R(COX)t, R is a moiety according to any of groups I a)- IV A) and VI A) for the preparation of medicaments for treating vascular diseases

6th invention:

FURTHER INFORMATION CONTINUED FROM PCT/ISA/

claim 6 (part.)
use of compounds of formula A-X1-NO₂ with A= R(COX)t, R is a moiety according to any of groups I a)- IV A) and VI A) for the preparation of medicaments for treating gastrointestinal tumors

IMPORTANT NOTIFICATION

International application No.
PCT/EP97/04774

International filing date (day/month/year)
02/09/1997

Priority date (day/month/year)
04/09/1996

Applicant

NICOX S.A. et al.

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference H\overline{F} 96177/PCT/061	FOR FURTHER ACTION		See Notification of Transmittal of International Preliminary Examination Report (PCT/IPEA/416)
International application No. PCT/EP97/04774	International filing date (day/month/year) 02/09/1997	Priority date (day/month/year) 04/09/1996	
International Patent Classification (IPC) or national classification and IPC C07D213/00			
Applicant NICOX S.A. et al.			

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.

2. This REPORT consists of a total of 5 sheets, including this cover sheet.

- ☒ This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of 24 sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☐ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☒ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☐ Certain documents cited
- VII ☒ Certain defects in the international application
- VIII ☐ Certain observations on the international application

Date of submission of the demand 26/02/1998	Date of completion of this report 18.12.98
Name and mailing address of the IPEA/  European Patent Office D-80298 Munich Tel. (+49-89) 2399-0. Tx: 523656 epmu d Fax: (+49-89) 2399-4465	Authorized officer Uiber, P Telephone No. (+49-89) 2399-8474 

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/EP97/04774

I. Basis of the report

1. This report has been drawn on the basis of (*substitute sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.*):

Description, pages:

1-63 as originally filed

Claims, No.:

1,2 as received on 10/06/1998 with letter of 08/06/1998

2. The amendments have resulted in the cancellation of:

☐ the description, pages:

☐ the claims, Nos.:

☐ the drawings, sheets:

3. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

4. Additional observations, if necessary:

IV. Lack of unity of invention

1. In response to the invitation to restrict or pay additional fees the applicant has:

☒ restricted the claims.

☐ paid additional fees.

☐ paid additional fees under protest.

☐ neither restricted nor paid additional fees.

2. ☐ This Authority found that the requirement of unity of invention is not complied and chose, according to Rule 68.1, not to invite the applicant to restrict or pay additional fees.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/EP97/04774

3. This Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is

- ☐ complied with.
- ☒ not complied with for the following reasons:

see separate sheet

4. Consequently, the following parts of the international application were the subject of international preliminary examination in establishing this report:

- ☐ all parts.
- ☒ the parts relating to claims Nos. 1 and 2.

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes: Claims 1,2
	No: Claims
Inventive step (IS)	Yes: Claims
	No: Claims 1,2
Industrial applicability (IA)	Yes: Claims 1,2
	No: Claims

2. Citations and explanations

see separate sheet

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

see separate sheet

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/EP97/04774

- 1). a) For the assessment of the present claims 1 and 2 on the question whether they are industrially applicable, no unified criteria exist in the PCT. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

b) In Contracting States where such claims are regarded as susceptible of industrial applicability, the following applies
- 2). The following documents (D1-D18) are referred to in this report; the numbering results from the order of citations found in the Search Report (SR) and it will be adhered to in the rest of the procedure.
- 3). The present application is not unitary in the sense of R.13.1 PCT. The reasons for this objection can be found in form PCT206 attached to the SR.
- 4). With respect to the available cited prior art, D1-D18, , it appears that the use of the compounds with general formula A-X1-NO₂, according to claims 1 and 2 is novel (Art. 33(2) PCT) as none of these documents reports the use of said derivatives for the treatment of urinary incontinence.
- 5). a) According to D7, nitric oxide synthetase (NOS) inhibitors are effective for inhibiting micturition (see claim 24).
The present derivatives, nitroxybutylesters of Ibuprofen, flurbiprofen, aspirin, (see also D15, abstract, item 2) are reported to be effective NOS inhibitors (see p.60-61; D15, abstract, item 6).
Likewise, NSAIDs or COX-2 inhibitors are already known to be effective in the treatment of incontinence (see D1), it can be derived that the present compounds being a combination of a COX-2 inhibitor or a NSAID with a nitroxyester function will be effective in the treatment of urinary incontinence as well.
To the contrary, the Applicant states that said derivatives achieve said therapeutic effect by the combination of their COX-inhibiting effect and their NO release (p.40, 2nd full par.).

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/EP97/04774

b) This contradiction between D7 and the present results is not clarified in the present application.

c) Moreover, a synergism is claimed to occur upon combination of the two therapeutic agents, however, there is no evidence of said effect as the tests disclosed in the application do not report the effect induced by NO release alone.

d) Finally, the tests in the present application have been only carried out with one class of compounds, the NSAIDs or COX-2 inhibitors whereas diuretics of the class V Ad) and V Ae) are claimed as well.

There is no evidence that such combinations may have the same therapeutic activity with a synergistic effect.

It is reminded that any compound or (in the present case) each group of compounds (being claimed) must solve the problem posed, i.e. the treatment of urinary incontinence.

As already acknowledged by the Applicant, diuretics for edema therapy is well known (edema may be one aspect of urinary incontinence), so that the administration of a NO donor together with a diuretic appears to be an obvious combination as D17 already report the positive effect of NO on micturition.

The absence of tachyphylaxis in the case of diuretics is not evidenced (see the description, p.59, I.3-6).

e) In view of the previous items 5 b)-d), the IPEA comes to the conclusion that claims 1 and 2 do not involve an inventive step (Art.33(3) and R.65 PCT).

6) Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the documents D1, D6-D8 and D10-D18 are not mentioned in the description, nor are these documents identified therein.

CLAIMS

1. Use of the following groups of compounds, or their compositions, for the preparation of medicaments for the treatment of urinary incontinence, having the general formula:

or their salts, where:

A = R(COX)_t where t is an integer 0 or 1;

X = O, NH, NR_{1C} where R_{1C} is a linear or branched alkyl having from 1 to 10 C atoms;

R is chosen from the following groups:

* Group I A), where t = 1,

(IAa)

(IAb)

where:

R_{II5} is H, a linear or whenever possible branched C_1-C_3 alkyl;

R_{II6} has the same meanings as R_{II5} , or when R_{II5} is H it can be benzyl;

R_{II1} , R_{II2} and R_{II3} are equal or different one from the other and are hydrogen, linear or whenever possible branched C_1-C_6 alkyl or C_1-C_6 alkoxy, or Cl, F, Br;

R_{II4} is R_{II1} or bromine;

preferred are the compounds where R_{II1} , R_{II2} and R_{II4} are H, and R_{II3} is Cl and R_{II3} is in the ortho position to NH; R_{II5} and R_{II6} are H, X is equal to O, and X_1 is $(CH_2-CH_2-O)_2$;

(I Ab) is the residue of 2-[[2-methyl-3-(trifluoromethyl)phenyl]amino]-3-pyridinecarboxylic acid and when -COOH is present it is known as flunixin.

The compounds preferred are those where $X = O$;

* II A) chosen from the following:

where, when $t = 1$, R is

where R_{2a} and R_{3a} are H, a linear or whenever possible

branched substituted or non-substituted C_1 - C_{12} alkyl, allyl, with the proviso that when one of the two is allyl the other is H; preferably R_{2a} is H, alkyl has from 1 to 4 C atoms, R_{3a} is H;

R_{1a} is chosen from

II Aa)

(II)

(XXI)

(IV)

(VII)

(XXXV)

(VI)

(VIII)

(IX)

(X)

where meanings are as follows:

- in the compounds of formula (IV), residue of ketoprofen:

R_{III1} is H, SR_{III3} where R_{III3} contains from 1 to 4 C linear or whenever possible branched C atoms;

R_{III2} is H, hydroxy;

preferred are the compounds where R_{III1} and R_{III2} are H, R_{3a} is H, and R_{2a} is methyl, $X = O$;

- in the compounds of formula (XXI), residue of carprofen:

R_{xxio} is H, a linear or whenever possible branched alkyl having from 1 to 6 carbon atoms, a C_1 - C_6 alkoxy-carbonyl bound to a C_1 - C_6 alkyl, a C_1 - C_6 carboxyalkyl, a C_1 - C_6 alkanoyl, optionally substituted with halogen, benzyl or halobenzyl, benzoyl or halobenzoyl;

R_{xxi} is H, halogen, hydroxy, CN, a C_1 - C_6 alkyl optionally containing OH groups, a C_1 - C_6 alkoxy, acetyl, benzoyloxy, SR_{xxi2} where R_{xxi2} is a C_1 - C_6 alkyl; a perfluoroalkyl having from 1-3 C atoms, a C_1 - C_6 carboxyalkyl optio-

nally containing OH groups, NO₂, sulphamoyl, dialkyl sulphamoyl with the alkyl having from 1 to 6 C atoms, or difluoroalkylsulphonyl with the alkyl having from 1 to 3 C atoms;

R_{xxi1} is halogen, CN, a C₁-C₆ alkyl containing one or more OH groups, a C₁-C₆ alkoxy, acetyl, acetamido, benz-yloxy,

SR_{III3} is as above defined, a perfluoroalkyl having from 1 to 3 C atoms, hydroxy, a carboxyalkyl having from 1 to 6 C atoms, NO₂, amino, a mono- or dialkylamino having from 1 to 6 C atoms, sulphamoyl, a dialkyl sulphamoyl having from 1 to 6 C atoms, or difluoroalkylsulphamoyl as above defined; or R_{xxi} jointly with R_{xxi1} is an alkylene dioxy having from 1 to 6 C atoms;

preferred are the compounds where R_{xxio} is H, the connecting bridge is at position 2, R_{xxi} is H, R_{xxi1} is chlorine and is in the para position to nitrogen;

R_{3a} is H, R_{2a} is methyl and X is O;

- in the compounds of formula (XXXV), residue of thia-profenic acid: Ar is phenyl, hydroxyphenyl optionally mono- or polysubstituted with halogen, an alkanoyl or alkoxy having from 1 to 6 C atoms, a trialkyl having from 1-6 C atoms, preferably from 1-3 C atoms, cyclo-

pentyl o-hexyl o-heptyl, heteroaryl, preferably thienyl, furyl optionally containing OH, pyridyl;

the preferred compounds of formula (XXXV) are those where Ar is phenyl, R_{3a} is H, R_{2a} is methyl and X is O;

- in the compounds of formula (II), residue of suprofen,

the preferred, where $R_{3a} = H$, $R_{2a} = CH_3$ and $X = O$;

- in the compounds of formula (VI),

of which the preferred, indoprofen, when R_{2a} is CH_3 or indobufen, when R_{2a} is equal to H and $R_{3a} = CH_3$ and $X = O$;

- in the compounds of formula (VIII),

of which the preferred, etodolac, when $R_{3a} = R_{2a} = H$ and $X = O$;

- in the compounds of formula (VII),

of which the preferred, fenoprofen, when $R_{3a} = H$, $R_{2a} = CH_3$ and $X = O$;

- in the compounds of formula (III),

of which the preferred, fenbufen, when $R_{3a} = R_{2a} = H$ and $X = O$;

- in the compounds of formula (X), residue of tolmetin, when $R_{3a} = R_{2a} = H$ and $X = O$;

- in the compounds of formula (IX), residue of flurbi-

profen, when $R_{3a} = H$, $R_{2a} = CH_3$ and $X = O$;

II Ab) :

IIIa)

(XXX)

(XXXI)

(XXXII)

(XXXIII)

(XXXVI)

(XXXVII)

where the meanings are as follows:

- when IIIa) contains $-\text{CH}(\text{CH}_3)-\text{COOH}$ it is known as pranoprofen: α -methyl-5H-[1] benzopyran [2,3-b]pyridine-7-acetic acid; preferred $\text{R}_{2a} = \text{H}$, $\text{R}_{3a} = \text{CH}_3$ and $\text{X} = \text{O}$;
- when residue (XXX) contains $-\text{CH}(\text{CH}_3)-\text{COOH}$ it is known as bermoprofen: dibenz [b,f] oxepin-2-acetic acid, preferred is $\text{X} = \text{O}$, $\text{R}_{2a} = \text{H}$, $\text{R}_{3a} = \text{CH}_3$;

- residue (XXXI) is known as CS-670: 2-[4-(2-oxo-1-cyclohexylidenemethyl)phenyl]propionic acid, when the radical is $-\text{CH}(\text{CH}_3)-\text{COOH}$; preferred $\text{R}_{2a} = \text{H}$, $\text{R}_{3a} = \text{CH}_3$ and $\text{X} = \text{O}$;
 - residue (XXXII) derives from the known pemedolac which contains group $-\text{CH}_2\text{COOH}$, preferred $\text{R}_{2a} = \text{R}_{3a} = \text{H}$ and $\text{X} = \text{O}$;
 - when residue (XXXIII) is saturated with $-\text{CH}_2\text{COOH}$ it is known as pyrazolac: 4-(4-chlorophenyl)-1-(4-fluorophenyl)3-pyrazolyl acid derivatives; preferred $\text{R}_{2a} = \text{R}_{3a} = \text{H}$ and $\text{X} = \text{O}$;
 - when residue (XXXVI) is saturated with $-\text{CH}(\text{CH}_3)-\text{COO}-$ it is known as zaltoprofen. When the residue is saturated with a hydroxy or amine group or the acid salts, the compounds are known as dibenzothiepin derivatives. Preferred $\text{R}_{2a} = \text{H}$, $\text{R}_{3a} = \text{CH}_3$ and $\text{X} = \text{O}$;
 - when residue (XXXVII) is CH_2-COOH it derives from the known mofezolac: 3,4-di(p-methoxyphenyl)isoxazol-5-acetic acid; preferred are $\text{R}_{2a} = \text{R}_{3a} = \text{H}$, $t = 1$, $\text{X} = \text{O}$.
- * Group IIIA), where $t = 1$,

where:

R_{IVd} and R_{IVd1} are at least one H and the other a linear or whenever possible branched C_1 - C_6 alkyl, preferably C_1 and C_2 , or difluoroalkyl with the alkyl having from 1 to 6 C atoms, preferred is C_1 , or R_{IVd} and R_{IVd1} jointly form a methylene group;

R_{IV} has the following meaning:

where the compounds of group IIIA) have the following meanings:

- in the compounds of formula (II):

R_{IV-II} is an alkyl having from 1 to 6 C atoms, a cycloalkyl having from 3 to 7 C atoms, an alcoxymethyl having from 1 to 7 C atoms, a trifluoroalkyl having from 1 to 3 C atoms, vinyl, ethynyl, halogen, an alkoxy having from 1 to 6 C atoms, a difluoroalkoxy with the alkyl having from 1 to 7 C atoms, an alcoxymethyloxy having from 1 to 7 C atoms, an alkylthiomethyloxy with the alkyl having from 1 to 7 C atoms, an alkylmethylthio with the alkyl having from 1 to 7 C atoms, cyano, difluoromethylthio, a substituted phenyl- or phenylalkyl with the alkyl having from 1 to 8 C atoms; preferably R_{IV-II} is CH₃O, R_{IVd} is H and R_{IVd1} is CH₃, and is known as the residue of naproxen;

X = NH and X₁ is equal to (CH₂)₄ or (CH₂CH₂O)₂; also preferred is the same compound where X is equal to O;

- in the preferred compounds of formula (X), for which the residue of loxoprofen has been shown, R_{IVd} is H and R_{IVd1} is CH₃, X = NH or O and X₁ is equal to (CH₂)₄ or (CH₂CH₂O)₂;

- in the compounds of formula (III):

R_{IV-III} is a C₂-C₅ alkyl, even branched when possible, a C₂ and C₃ alkyloxy, allyloxy, phenoxy, phenylthio, a cycloalkyl having from 5 to 7 C atoms, optionally sub-

stituted at position 1 by a C₁-C₂ alkyl;
preferred is the compound where R_{IV-III} is

and R_{IVd} = H, R_{IVd1} is CH₃, a compound known as the residue of ibuprofen; X = NH and X₁ is equal to (CH₂)₄ or (CH₂CH₂O)₂; also preferred is the same compound where X = O;

* Group IV A)

(IV)

where A = RCOO, t = 1,

of which the residue of the known indomethacin has been shown.

* Group V A) chosen from the following:

- V Aa) fenamates chosen from the following,

where t = 1

(V Aa1)

(V Aa2)

(V Aa3)

(V Aa4)

- V Ab), derivatives of niflumic acid, where $t = 1$:

- V Ac), COX₂ inhibitors, where $t = 0$ and R is as follows:

(V Ac2)

(V Ac3)

(V Ac4)

- V Ad) derivatives of diuretics when $t = 1$ and R is as follows:

(V Ad4)

- V Ae) derivatives of diuretics when $t = 0$ and R is as follows:

(V Ae1)

(V Ae2)

(V Ae3)

(V Ae4)

(V Ae5)

(V Ae6)

(V Ae7)

(V Ae8)

(V Ae9)

(V Ae10)

(V Ae11)

(V Ae12)

where the meaning in group V A) is as follows:

- in compounds (V Aa1) the residue of enfenamic acid, 2-[(2-phenylethyl)amino]benzoic acid, has been shown;
- in compounds (V Aa2) the residue of flufenamic acid, 2-[[3-(trifluoromethyl)phenyl]-amino]benzoic acid, has been shown;
- in compounds (V Aa3) the residue of meclofenamic acid, 2-[(2,6-dichloro-3-methylphenyl)amino]benzoic acid, has been shown;
- in compounds (V Aa4) the residue of mefanamic acid, 2-[(2,3-dimethylphenyl)amino]benzoic acid, has been shown;
- in compounds (V Aa5) the residue of tolfenamic acid, 2-[(3-chloro-2-methylphenyl)amino]benzoic acid, has been shown;
- in compounds (V Ab1) the residue of niflumic acid, 2-[[3-(trifluoromethyl)phenyl]amino]-3-pyridine carboxylic acid, has been shown;
- in compounds (V Ac1)_{Rvac1} attached to the oxygen atom in position 2 of the benzene ring of N-(4-nitrophenyl)methansulphonamide can be phenyl or cyclohexane. When R_{vac1} is phenyl the residue is that of nimesulide;
- in compounds (V Ac2) the residue of 3-formylamino-7-

methylsulfonylamino-6-phenoxy-4H-1-benzopyran-4-one has been shown;

- in compounds (V Ac3) the atom X_4 that links the radical 2,4-difluorothiophenyl to position 6 of the indanone ring of the residue 5-methanesulfonamido-1-indanone can be sulfur or oxygen;

- in compounds (V Ac4) the residue of celecoxib 4-[5-(4-methylphenyl)-3-(trifluoromethyl)pyrazol-1-yl] benzenesulphonamide, has been shown;

- in compounds (V Ac5) the residue of 6-[2-(3-ethyl-2,3-dihydro-thiazolyl)thio-5-methanesulphonamido-3H-isobenzofuran-1-one has been shown.

- in compounds (V Ad1) the residue of bumetanide 3-(Aminosulfonyl)-5-(butylamino)-4-phenoxybenzoic acid has been shown;

- in compounds (V Ad2) the residue of ticrynafen [2,3-Dichloro-4-(2-thienylcarbonyl)-phenoxy]acetic acid has been shown;

- in compounds (V Ad3) the residue of ethacrynic acid [2,3-Dichloro-4-(2-methylene-1-oxobutyl)phenoxy]acetic acid, has been shown;

- in compounds (V Ad4) the residue of piretanide 3-(Aminosulfonyl)-4-phenoxy-5-(1-pyrrolidinyl)benzoic

acid has been shown.

- in compounds (V Ae1) the residue of tripamide (3a α , 4 α , 7 α , 7a α)-3-(Aminosulphonyl)-4-chloro-N-(octahydro-4,7-metano-2H-isoindol-2-yl)benzamide has been shown.
- in compounds (V Ae2) the residue of torsemide N-[[[(1-Methylethyl)amino]carbonyl]4-[(3-methylphenyl)amino]-3-pyridinesulfonamide has been shown;
- in compounds (V Ae3) the residue of azosemide 2-Chloro-5-(1H-tetrazol-5-yl)-4-[(2-thienylmethyl)amino]benzenesulfonamide has been shown;
- in compounds (V Ae4) the residue of bendroflumethiazide 3,4-Dihydro-3-(phenyl-methyl)-6-(trifluoromethyl)-2H-1,2,4-benzothiadiazine-7-sulfonamide 1,1-dioxide has been shown;
- in compounds (V Ae5) the residue of chlorothiazide 6-Chloro-2H-1,2,4-benzothiadiazine-7-sulfonamide 1,1-dioxide has been shown;
- in compounds (V Ae6) the residue of hydrochlorothiazide 6-Chloro-3,4-dihydro-2H-1,2,4-benzothiadiazine-7-sulfonamide 1,1-dioxide has been shown;
- in compounds (V Ae7) the residue of methylclothiazide (6-Chloro-3-(chloromethyl)-3,4-dihydro-2-methyl-2H-1,2,4-benzothiadiazine-7-sulfonamide 1,1-dioxide has

been shown;

- in compounds (V Ae8) the residue of chlorthalidone 2-Chloro-5-(2,3-dihydro-1-hydroxy-3-oxo-1H-isoindol-1-yl)benzensulfonamide has been shown;

- in compounds (V Ae9) the residue of Indapamide 3-(Aminosulfonyl)-4-chloro-N-(2,3-dihydro-2-methyl-1H-indol-1-yl)benzamide has been shown;

- in compounds (VAe10) the residue of metolazone 7-Chloro-1,2,3,4-tetrahydro-2-methyl-3-(2-methylphenyl)-4-oxo-6-quinazolinesulfonamide has been shown;

- in compounds (V Ae11) the residue of quinetazone 7-Chloro-2-ethyl-1,2,3,4-tetrahydro-4-oxo-6-quinazoline-sulfonamide has been shown;

- in compounds (V Ae12) the residue of furosemide 5-(Aminosulfonyl)-4-chloro-2-[(2-furanylmethyl)amino]benzoic acid has been shown.

X_1 in formula A- X_1 -NO₂ is a bivalent connecting bridge chosen from the following:

- YO

where Y is a linear or whenever possible branched C₁-C₂₀ alkylene, preferably having from 2 to 5 carbon atoms, or an optionally substituted cycloalkylene having from 5 to 7 carbon atoms;

where n_3 is an integer from 0 to 3;

where nf' is an integer from 1 to 6, preferably from 2 to 4;

where $R_{1f} = H, CH_3$ and nf is an integer from 1 to 6, preferably from 2 to 4.

2. Use of the compounds according to Claim 1, in which R is chosen from groups IV A) and V A).
3. Compounds or their compositions for use as medicaments from group V A) in Claim 1.
4. Compounds from group V A) according to Claim 1.
5. Compounds or their compositions for use as medicaments

from group V A) according to Claim 3 for the treatment of musculoskeletal disease of an inflammatory nature, respiratory disease of an inflammatory nature, gynaecological and obstetrical disease including early delivery, pre-eclampsia and dysmenorrhoea, cardiovascular disease including re-stenosis, gastrointestinal tumours.

6. Use of the following compounds, or their compositions, for the preparation of medicaments for the following therapeutical applications:

treatment of respiratory disease: bronchitis, in particular asthma: groups from I A) to V A) in Claim 1;

gynaecological and obstetrical disease including early delivery, pre-eclampsia and dysmenorrhoea: groups from I A) to V A) in Claim 1 and group VI A) as defined below;

vascular disease including re-stenosis: groups from I A) to V A) in Claim 1 and group VI A);

gastrointestinal tumours: groups from I A) to V A) in Claim 1 and group VI A);

the compounds in group VI A) have the general formula

of Claim 1, where $t = 1$, include the following:

(Ia)

(Ib)

where:

R₁ is group OCOR₃; where R₃ is methyl, ethyl or a linear or branched C₃-C₅ alkyl, or the residue of a single-ring heterocycle having 5 or 6 atoms which can be aromatic, partially or totally hydrogenated, containing one or more heteroatoms independently chosen from O, N and S;
 R₂ is hydrogen, hydroxy, halogen, a linear or whenever possible branched alkyl having from 1 to 4 C atoms, a linear or whenever possible branched alcoxyl having from 1 to 4 C atoms; a linear or whenever possible branched perfluoroalkyl having from 1 to 4 C atoms, for example trifluoromethyl, nitro, amino, mono- or

di(C₁₋₄)alkylamino;

R₁ and R₂ jointly are the dioxymethylene group, with the proviso that when X = NH, then X₁ is ethylene and R₂ = H; R₁ cannot be OCOR₃ at position 2 when R₃ is methyl; nI being an integer from 0 to 1;

preferably in Ia), X is equal to O or NH, R₁ is acetoxy, preferably at position 3 or 4, most preferably in the ortho position to CO. X₁ is ethylene or (CH₂CH₂O)₂, R₂ is hydrogen or halogen, most preferred are the following A X₁ NO₂ compounds: 3-acetoxy-N-(2-nitroxyethyl)-benzamide, 4-acetoxy-N-(2-nitroxyethyl)-benzamide, 3-acetoxy-N-(5-nitroxypentyl)-benzamide, 2-acetoxy-N-(5-nitroxypentyl)-benzamide, N-2-(nitroxyethyl)-2-propionyloxybenzamide, 2-acetoxy-2-nitroxyethylbenzoate, 2-acetoxy-N-(cis-2-nitroxycyclohexyl)-benzamide, 2-acetoxy-4-chloro-N-(2-nitroxyethyl)-benzamide, N-(2-nitroxyethyl)-2-((4-thiazolindinyl)carbonyloxy)-benzamide hydrochloride, 2-nicotinoyloxy-N-(2-nitroxyethyl)-benzamide, 2-acetoxy-5-nitroxypentylbenzoate;

preferably in Ib) R₃ = CH₃, nI = 0;

X is equal to O, X₁ is ethylene; in this case Ib) is the residue of acetylsalicylsalicylic acid.
